PROFESSIONAL SUMMARY

Passionate MERN Stack Developer with strong proficiency in JavaScript, React.js, Node.js, Express.js, and MongoDB. Eager to leverage my problem-solving skills and technical knowledge to build scalable, high-performance web applications.

EDUCATION

BTech (CSE) , Technocrates Institute of Technology, Bhopal 2023-27
CGPA - 7.6

Senior Secondary (12th), Science (PCM) , UP Board , 67 p. 2022

Secondary (10th) , UP Board , 78 p. 2020

TECHNICAL SKILLS

Language	C++ , JavaScript
Front-End	React.js, Next.js, JavaScript, Redux Toolkit, HTML5, CSS3, Bootstrap
Back-End	Express, Node.js
Database	MongoDB , SQL
Developer Tools	Github , Visual Studio , Figma , Jira

PROJECTS

EasyService - Searvice based platform: [gitHub](#)

- Developed a full-stack MERN service marketplace platform with JWT authentication, role-based access control (Admin, Shop Owner, User), and scalable REST APIs.
- Implemented real-time chat (Socket.io), worker assignment, order management, and Razorpay payment integration to streamline service booking and management.
- Implemented an AI-powered recommendation system with a responsive and user-friendly interface.

UniGen-AI – Multimodal AI Content Generation Platform [gitHub](#)

- Built a full-stack AI content generation platform using Node.js, enabling users to generate AI text and images through prompt-based interactions.
- Integrated LangChain orchestration with Hugging Face APIs to create scalable pipelines for LLM-powered content generation.
- Currently expanding the platform to support multimodal AI capabilities including video generation and advanced prompt workflows.

ShoeVerse - Emphasizes focus on footwear: [gitHub](#)

- Developed a full-stack shoe e-commerce platform using MERN stack, supporting SuperAdmin, Seller, and User roles with secure JWT-based authentication.
- Integrated Razorpay payment gateway for smooth order processing, including payment creation and verification workflows.
- Implemented Seller KYC verification, product management, and order tracking, using Redux for efficient state management and a scalable architecture.
